OVERVIEW

Dedicated developer with a background in:

- Development with Java for five years
- Experience with MySQL as a relational database
- Two years working with HTML, Javascript, and CSS
- Experience with React, JSX, and Redux

EXPERIENCE

LUNIVERSE | FAIRFAX, VA

Intern | July 2018–Present

Worked in a small team using Ruby/Rails and Google Translate API to develop a chat translation app.

- Designed, set up, developed, and tested a new Ruby application
- Followed AGILE methodology with daily Scrum meetings
- Peer reviewed code and created pull-requests in Git

PROJECTS

PERSONAL WEBSITE

Resume and Portfolio | React, AWS

Developed a React website that contains my skills, education, and experience.

- Built using React, designed using SCSS, hosted with AWS
- Made responsive for smaller screens

GETAR

Tweet Visualization | Python, Tableau

Worked with a team to create visualizations of data from Twitter.

- Retrieved tweet data and sentiment analysis using public API
- Created Python scripts for processing large quantity of data
- Overcame new obstacles that would rise with new requirements

LINBASE

Website Maintenance | PHP, HTML, MySQL

Pair-coded with colleague to maintain the website for LinBase.

- Documented and cleaned code for better readability
- Changed and improved website layout

BATTLE OF THE RHINE RIVER

Historical Website | PHP, Javascript, JQuery, AJAX, MySQL, AWS

Created website documenting battle that occurred at Rhine River.

- Created RESTful endpoints to interface with historical data
- Implemented UI for performing operations
- Has user authentication and multiple levels of administration
